

### Technology Transfer of Liquid formulation of Liquid formulation of entomopathogenic fungus - *Beauveria bassiana*

The liquid formulation of Entomopathogenic fungus isolate - *Beauveria bassiana* is a unique technology of ICAR-NRCB which is effective against banana insect pests. The liquid formulation is also better than solid formulation (Talcum formulation) with a shelf life of two years. The ITMU of ICAR-NRCB transferred the liquid formulation technology to the State Bio Control Laboratory, Mannuthy, Thrissur-680651, Kerala on 27.02.2016 with one day hands on training on the preparation of liquid formulation. On this occasion, Dr. B Padmanaban, Director, ICAR-NRCB handed over the technology to Smt. Honey Mathews, Deputy Director of Agriculture, State Bio Control Laboratory in the presence of Shri. N S Sureshkumar, Agricultural Officer, State Bio Control Laboratory.

Dr. B. Padmanaban, Acting Director, ICAR-NRCB handing over the MoU to State Bio Control Laboratory, Kerala
